FOR ASSOCIATIONS OF INSTITUTIONS

Run your AGM, subscriptions and representative voting properly.

For associations whose members are institutions, such as community banks (formerly rural banks), credit unions, schools or hospitals. Each institution sees only its own records.

SOUND FAMILIAR?

AGM registration by email and spreadsheet
Delegate lists, fees and badges arrive late and in different formats from each institution.

Who may vote for each institution?
Attendance gets confused with voting rights, and replacements cause disputes.

Subscriptions by tier are hard to follow
Amounts differ by tier, and standing is pieced together from bank statements.

What changes with Communora360

- **Delegates within agreed places**
  Set a default number of places, adjust for any institution with a reason, and choose hard or advisory limits.
- **Representatives do the data entry**
  Each institution's representative adds its delegates, pays by Mobile Money and prints its own badges.
- **Clear voting rights**
  Designate who votes for each institution, with optional second approval. Attending does not give a vote.
- **Weighted votes where your rules need them**
  Results show both ballots and weight, each on its own chart.
- **Governance history**
  Record each member institution's CEO, board chairman and other office holders, with terms and history.

Features you will use

Member institutions
Full name, tier, licence number, region, people

Subscriptions by tier
Or one amount for every institution

Events with allocations
Delegate categories, fees per delegate or per institution

Association accounts (optional)
Subscriptions post themselves; AGM-ready reports

Representative voting
On the web or by USSD from the designated phone

Linked organisations
Totals that member organisations choose to share

Set up institutions and their people → **Publish** the AGM with places per institution → **Representatives** register delegates and pay → **Vote** through designated representatives

Request a demonstration

We will set up sample data for your kind of organisation and walk your team through it.

Examples describe the type of association, not existing customers. Door check-in needs an internet connection. Linked organisations share totals only, never member-level records. Features depend on your organisation's profile and the modules switched on. Illustrative screens use sample data.
