Communora360
by EBITS

My People, Our Purpose, One Platform

My People, Our Purpose, One Platform

One platform to manage your members, collections, communication, events and governance. Built in Ghana for associations, churches, institutions and welfare groups.

Web portal · Mobile app · USSD *928*7# on any phone · Mobile Money · SMS

WHY ORGANISATIONS MOVE TO COMMUNORA360

One record you can trust

Members, payments, events, votes and office holders in one system, not scattered across notebooks, Excel files and WhatsApp groups.

Every member can take part

Members pay and vote through the web, the app or USSD. A smartphone is not required for paying, checking dues or voting.

Accountability built in

Roles for each officer, nobody approving their own entries, sealed election results and an audit trail that cannot be edited.

See it working for your kind of organisation.
A guided demonstration with sample data, set up for your organisation's profile.

WHAT COMMUNORA360 BRINGS TOGETHER

Spreadsheets and group chats work, until the AGM, the audit or the treasurer's handover.

Communora360 replaces the scattered tools with one accountable system. It switches on the right features for your kind of organisation and uses your own words: "cells", "member institutions" or "subscriptions".

Members and records

The problem · **Out-of-date lists in several files**

One register with Member IDs, groups and profiles. Import your existing Excel list without retyping it. Members can register online and renew themselves.

Collections

The problem · **"Who has paid?" takes days to answer**

Dues, levies, contributions and giving by USSD, Mobile Money, cash or bank. Every payment is recorded against the member, with an SMS receipt. Online payments go into **your own Hubtel merchant account**.

Communication

The problem · **Important notices lost in busy chats**

Targeted SMS to a group, a region or those who still owe, with each member's details filled in. Reminders, receipts and a members' home page with news in the app and portal.

Events

The problem · **Registration by list, badges by hand**

Online registration with fees by Mobile Money, badges with QR codes, check-in at the door, attendance by session and, for societies, CPD points with certificates you can verify.

Elections and governance

The problem · **Disputes over who may vote and the count**

Voting programmes with a controlled electorate, ballot preview, voting on the web and by USSD, and results sealed until an electoral commissioner releases them. Executives and their terms are kept, with full history.

Reports and accounts

The problem · **Reports rebuilt by hand every quarter**

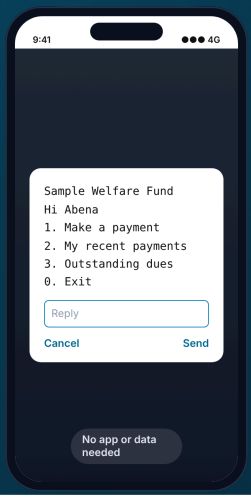

Branded reports to print, save as PDF or open in Excel, and the audit trail. With the optional Accounts module, payments post to the books themselves and expenses are approved with their receipts, ready for the AGM accounts.

How members take part

Member web portal
Profile, payments and receipts, events, elections, welfare claims and, where offered, loans.

Communora360 app
News, payments by Mobile Money, inbox, voting, event registration and badges, membership card.

USSD *928*7#
Pay for yourself or someone else, check recent payments and outstanding dues, and vote while voting is open. No app or mobile data needed.

USSD supports the activities listed above. Other activities, and event check-in at the door, need an internet connection. Features depend on your organisation's profile and the modules switched on.

SOLUTIONS FOR YOUR KIND OF ORGANISATION

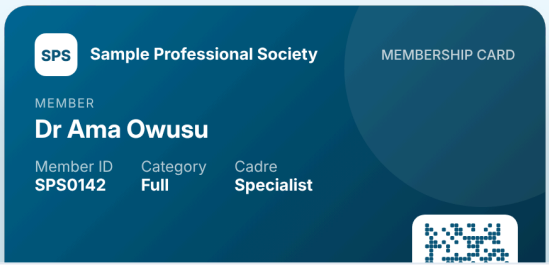

The same platform, set up the way your organisation works.

Professional societies

Societies, associations, unions

Know who is in good standing today, without chasing anyone.

- Online registration and approval
- Annual dues by category, renewal page and dues standing
- Membership cards with a verification QR code
- Interest groups, events and CPD certificates
- AGM elections with sealed results
- Clean import of Google Forms, ODK and KoBo exports

Churches

One assembly or many congregations

From the offering bowl to the church-wide report.

- Congregations, families, cells and ministries
- Services with attendance, loose collections and envelopes
- Tithes and offerings by MoMo, USSD and envelope
- Pledge appeals and giving statements
- Congregation totals side by side
- Staff limited to their own congregation

Associations of institutions

e.g. community banks, credit unions, schools, hospitals

Run your AGM, subscriptions and representative voting properly.

- Member institutions and their people
- Subscriptions by tier
- Delegate places per institution, badges and check-in
- A portal where each representative sees only their institution
- Voting through designated representatives, with weighted votes where your rules need them

Welfare groups and cooperatives

Welfare funds, staff groups, cooperatives

Apply your rules the same way for every member.

- Contributions by MoMo, USSD or check-off import
- Benefit rules, claims with evidence and approvals by different people
- Pay-outs made by you and recorded, with a second check
- Fund balances for your AGM
- Optional member loans: guarantors, schedules, repayments and a loan book

Also suitable for unions and staff associations, alumni groups, clubs, PTAs and community groups that collect dues and run events or elections.

GETTING STARTED

A guided start, with your own data and your own brand.

1

Discovery and demonstration

We learn how you work and show Communora360 with sample data for your kind of organisation.

2

Set-up

Your profile, features, payment types, your own words, and your logo and colours on screens, receipts and reports.

3

Bring your data

Import your existing member list from Excel or CSV. Rows that need fixing are shown with the reason.

4

Activate collections

Connect your own Hubtel merchant account. Test in simulation mode before real money moves.

5

Train and launch

Roles for each officer, welcome SMS to members, and a live Help centre on every screen.

Trust built in

Your money, your account
Online payments go straight into your organisation's own Hubtel merchant account. EBITS never holds your members' money.

Nobody approves their own entries
Nobody approves what they entered, confirms a pay-out they recorded, or decides their own claim or loan.

A permanent audit trail
Who did what and when, with before and after values. Entries cannot be edited or deleted.

Elections with documented safeguards
A controlled electorate, a ballot stored without the voter's identity, and results sealed until released.

Clear commercial terms

Your proposal sets out each item before you commit:

- Subscription to Communora360 (by plan or per active member)
- Setup and onboarding, where applicable
- SMS messages
- USSD sessions
- Payment processing under your agreement with Hubtel
- Any agreed fee on members' payments
- Optional modules you choose, such as Accounts

Rates: by quotation, set out in your proposal.

SMS and USSD usage is charged as agreed. Mobile Money collection needs an activated Hubtel merchant account.

Questions committees ask us

We already use Excel and WhatsApp. Why change?

Keep WhatsApp for conversation. Communora360 keeps the record: who paid, for what, who approved it and who may vote. You can import your Excel list on day one.

Can members without smartphones take part?

Yes, for paying, checking dues and voting. Members dial *928*7# on any phone, with no app or mobile data. Their phone number identifies them.

Can branches see only their own records?

Churches can limit a team member to one congregation. In associations of institutions, each representative sees only their own institution.
